TORNITA

LA GRAZIA E L'ARMONIA DELLA FORMA TONDA

Il "tondo" non è solo uno stilema, ma un design che appartiene alla cifra stilistica più tipica di Gessi, quella dei «Segni», e alla sua storia di creazioni. Forma perfetta per eccellenza, assolutamente trascendente stili e mode, il tondo dona una speciale grazia e armonia contemporanea al bagno. Gessi ha saputo scrivere per questa forma una storia tutta nuova, imprimendovi una tale freschezza di concezione da renderla totalmente inedita e attuale.

THE GRACE AND THE HARMONY IN THE ROUND SHAPE

The "circle" is not only a style, but a design that belongs to the most typical stylistic mood of Gessi, we are talking about "Segni" and about the story of creation. Perfect shape as excellence, absolutely transcendent style and fashion, the round gives a special grace and contemporaneous harmony to the bathroom.

Gessi was able to write for this shape of story all new, imprinting a huge freshness of concept to make it totally inedited and actual.

Gessi 316 è la perfetta sintesi di tecnologia avanzata, tocco artigianale e alto design. L'intera collezione è realizzata in Acciaio inossidabile AISI 316 e AISI 316L.

Gessi 316 is the perfect summary of advanced technology, artisan touch and high design. The complete collection is made in stainless steel AISI 316 and AISI 316L.

FLESSA

UN MATERIALE STRAORDINARIO PER UN DESIGN DI GRANDE BELLEZZA

Pochi materiali possono vantare una resistenza simile all'acciaio inox, che mai, in qualunque condizione ambientale, perde la propria brillantezza, la impeccabile eleganza, il colore ricco e profondo, richiedendo altresì una manutenzione minima.

L'acciaio del Programma Gessi 316, riafferma il concetto caro all'Azienda di "Design for nature": riciclabile al 100%, l'acciaio può infatti essere rigenerato e riciclato all'infinito, consentendo di ridurre il consumo delle risorse naturali.

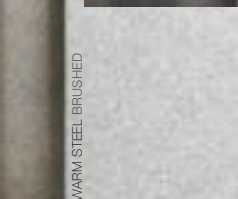

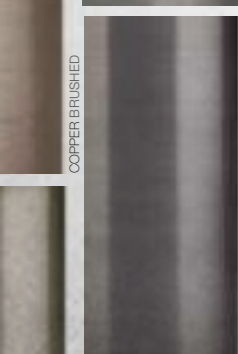

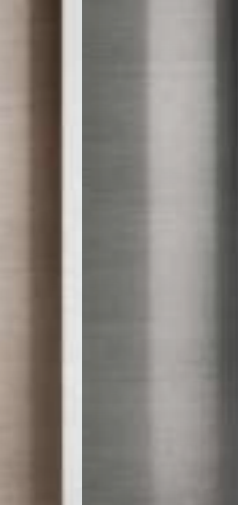

Non solo altamente performante, Gessi ha reso questo prezioso e nobile materiale, che da sempre impiega per il proprio Programma di docce Private Wellness®, elemento di grande versatilità e bellezza.

AN EXTRAORDINARY MATERIAL FOR A VERY BEAUTIFUL DESIGN

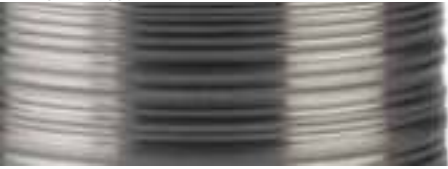

Not many materials can praise a resistant similar to the stainless steel, that never, in every environmental condition, loose the proper shining, perfect elegance, the rich color, asking also a really minimum maintenance.

The steel of the Programma Gessi 316, confirms the concept really important for the company: "Design for nature": recyclable 100%, steel can be regenerated and reused forever, permitting to reduce the consumption of natural resource.

Not only high performance, Gessi has made this precious and noble material, that from always, uses for his shower program Private Wellness®, an element very versatility and beauty.

RILIEVI DI CHARME

I pattern affascinanti di Trame e Intrecci, attraverso l'esclusiva lavorazione dell'acciaio inossidabile, creano pezzi dal sapore speciale, perfetti per chi ama l'essenzialità, ma vuole dare al bagno un tocco raffinato, high-tech ma caldo e decorativo.

ELEVATION OF CHARME

The charming patterns of Trame and Intrecci, through the exclusive manufacturing of the stainless steel, create pieces of special taste, perfect for who loves the essentiality, but wants to give to the bathroom a refinement touch, high-tech but decorative but warm.

**GESSI 316:
L'HIGH-TECH CHE EMOZIONA**

La creatività e lo stile Gessi, hanno saputo infondere nell'acciaio stesso una percepibilità totalmente nuova, dando a un materiale usualmente "tecnico" e freddo, un calore inedito, una capacità arredativa speciale. Gessi ha infatti arricchito il corpo del rubinetto di particolari estetici e decorativi, quali texture e pattern con motivi di diverso gusto, maniglie e canne differenziabili, finiture di charme contemporaneo e un innovativo sistema di lavabo modulare.

**GESSI 316:
HIGH-TECH THAT GIVES EMOTION**

The creativity and the style Gessi has known instill in the steel a perceptibility totally new, giving to a material usually technical and "cold", an inedited warmth, a furniture capability special. Gessi in fact has made rich the body of tap with esthetic and decorative particulars, as texture and pattern with different themes for different taste, handles and differentiable bar, charme finishes and a contemporaneous and innovative system of modular sink.

LA NUOVA RUBINETTERIA IN ACCIAIO DI GESSI

Un materiale nobile e prezioso, duraturo nel tempo, resistente e che fosse anche bello da vedere. Un elemento che esaltasse, con semplicità, le creazioni Gessi, dai rubinetti agli accessori, attraverso un design cilindrico, di grande immediatezza visiva e raffinatezza essenziale: nasce il Sistema Gessi 316, protagonista, l'esclusivo acciaio inossidabile AISI 316.

GESSI 316

THE NEW STEEL TAPS AND FITTINGS OF GESSI

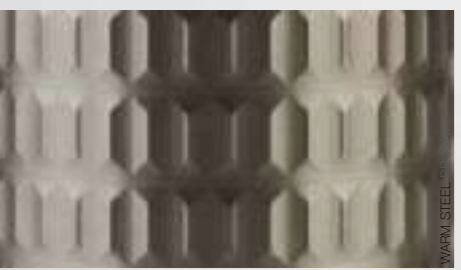

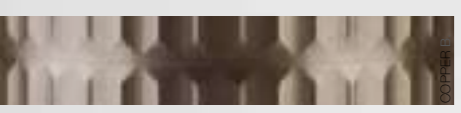

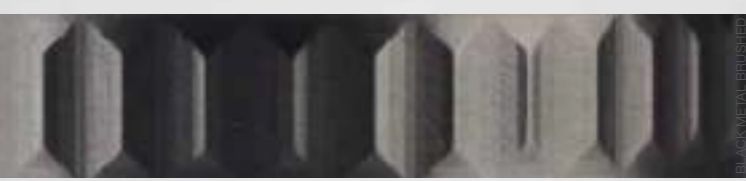

A precious and noble material, durable, resistant and that could be beautiful to see. An element that underline, with simplicity, the creations of Gessi, from taps to the accessories, into a cylindrical design of really important visual immediacy and essential refinement: It's born the Sistema Gessi 316, protagonist, the exclusive inox steel AISI 316.

TRATTAMENTO IS-PVD IS-PVD TREATMENT

IS-PVD è una evoluzione dei processi di deposizione sotto vuoto, che permette l'ottenimento di film sottili metallici con proprietà innovative. I rivestimenti IS-PVD presentano caratteristiche uniche sia per quanto riguarda la qualità dei film depositi, che per quanto riguarda le tecnologie impiegate. I rivestimenti IS-PVD costituiscono una innovazione anche per l'esclusività e ripetitività dei colori e per le eccezionali prestazioni in termini di durata.

Il processo

I componenti da rivestire vengono posti in una camera e successivamente posta sottovuoto fino a pressioni nell'ordine di 5-10 mbar.

All'interno di quest'ultima vengono generati i vapori dei materiali (titanio e zirconio) che costituiranno il rivestimento. I vapori si diffondono nella camera, raggiungendo anche i substrati, dove condensano. La condensazione avviene in presenza di gas di processo (Argon, Azoto, Metano) introdotti in maniera controllata nella camera. In tal modo alla condensazione si aggiungono chimiche che portano alla formazione di composti diversi da quelli di partenza.

IS-PVD is an enhanced vacuum technology for thin film deposition.

The new IS-PVD coatings have unique characteristics for both, surface quality and advanced production processes. Exclusive colours and high technical features define IS-PVD coatings innovation.

The process

Components to be treated are set in a chamber which is then vacuum-sealed at pressures of 5-10 mbar.

Inside the chamber titanium and zirconium vapours, which will form the coating, are produced.

Vapours spread in the chamber and condense deep in the substrates. Condensation develops in the presence of process gases (argon, nitrogen and methane) that are introduced into the chamber in a controlled way.

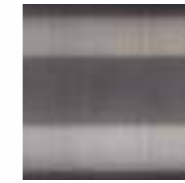

Added to condensation, these chemical processes form compounds that are different from the starting ones.
